

dotforms docu: Because documenting is so boring ...

The documenting of essential processes within the clinical and medical routine is becoming increasingly important. No wonder that people search for new ways to document their work particularly with special focus on electronic patients' files. To name only few: scanning, PDAs or tablet PCs. Yet, that is everything but fun as it often means laborious effort and disturbed general business processes.

dotforms docu helps you simplify the necessary documentation in astounding ways: patient or staff just fills out forms with the help of a digital pen. A midget CCD camera within the pen records the writing and saves it with time, pen ID and used form ID. When connected to a docking station, the information is transmitted automatically to the computer and a graphic of the completed form is supplied to your network.

paper being transported or scanned. As the pen is able to read barcodes, the document can automatically be allocated barcode-wise to the correct patient file. All records taken during a physician-patient visit are documented including all legally binding approvals by the patient. If desired, even the exact time or the duration of the conversation can be determined.

In this way, information such as the important patient's informed consents can be saved in the patient file without any

dotforms docu is ideally used for private patients' service selection. In this context, state-of-the-art technology as well as elegant presentation of the selectable service options impresses the clients. Along the way, an electronic copy is created with signature, date stamp, etc.

In addition and surprisingly at first glance, dotforms docu helps you saving on paper as any copy can easily be distributed electronically avoiding the necessity for paper copies.

dotforms docu complements your business in many ways. Tablet PCs offer excellent dialogue properties and dotforms creates an elegant, simple and intuitive data capture environment, strongly appreciated by staff. A perfect symbiosis that makes you happy and that converts the boring business of documenting into a technologically intriguing event.

Diagramm Halbach is a full-feature service provider for digital pen applications on the basis of the Anoto functionality.

We supply the complete system with all components and can implement it for your environment.

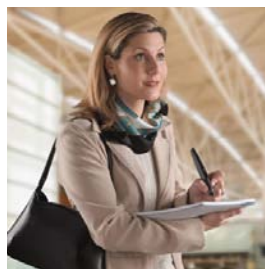

Diagramm Halbach, as one of the largest manufacturers of special paper and print products, possesses excellent capacities for the design, printing (offset as well as digital printing technology) and finishing of dotforms paper.
