

# dotforms pilot: Speed up your expense account!

***Are you paying your drivers per kilometer? Do you trust and believe the manual charges and quotes about the distance driven, destinations and times? That is honorable, but perhaps you are searching for techniques and ways to objectify the account of charges? This can be complex.***

dotforms is different. With dotforms pilot you have simultaneously a quick, simple and efficient technology at hand. The key: the driver receives a digital pen. At the destination of each tour, laminated target maps are provided on which the driver marks his presence by simply checking or ticking off a small box on this map with the digital pen. These maps are numbered and unique due to their background – specially preprinted with a miniature dot pattern. A midjet CCD camera within the pen is able to record the writing, thus it recognizes the arrived destination and beyond that, the pen provides time and pen-ID of the employee.

When the driver returns to the main office, depot or his office, the pen is connected to a docking station. The data from the pen are then transferred to

a computer and sent to a central location for evaluation purposes. The driver has no influence on the data. Thus, a detailed tour report (date, location, time, order of the reached destinations, etc.) is available – quickly and without substantial manual effort. A report that cannot be manipulated.

If desired, the actual mileage of a tour can be determined and compared with the account of charges. Corrections in the billing of only a few kilometers per route can easily imply cost savings of 5-digit Dollar amounts in an example of a medium-sized carrier company with about 50 drivers and several tours per day.

Due to the simplicity of the application, dotforms pilot is particularly useful in case of frequently changing staff. dotforms pilot can seriously speed up your business and make your company more profitable. Several application examples: driving services for ambulant care, laboratory communities and pharmacy services as well as bicycle couriers, sub-carriers, subsidiary tours, security firms, etc.

dotforms pilot will make your account of charges get a move on!

Diagramm Halbach is a full-feature service provider for digital pen applications on the basis of the Anoto functionality.

We supply the complete system with all components and can implement it for your environment.

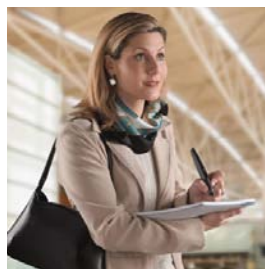

Diagramm Halbach, as one of the largest manufacturers of special paper and print products, possesses excellent capacities for the design, printing (offset as well as digital printing technology) and finishing of dotforms paper.

Diagramm Halbach is certified print partner of Anoto's for both offset printing (copied pattern) and digital printing (unique pattern).

**dotforms applications support paper-based mobile data entry ...**

- Local, internet and intranet solutions
- Barcodes
- Check box recognition (OMR)
- Handwriting recognition (HWR)
- Generation of digital graphics (JPG, PDF, TIF)
- Generation of XML, CSV and other data types
- Time stamp
- High capacity data verification
- USB and Bluetooth interfaces
- Unique and copied pattern
- Mobile phone application
